What about the Energy from Waste Plant (EFW)?

None of your kerbside collected recyclables go to the EFW.

The EFW burns waste which you place in your household wheelie bin. The electricity generated makes a contribution to the Islands power generation. However, recyclable materials such as glass and cans have no calorific value and it is therefore recommended that they are recycled.

PLEASE REMEMBER...

Your recycling should be placed in your boxes as loose items or segregated bags

Please take your green waste to your local amenity centre

Place your kerbside boxes out by 8am on your collection day. Need any help? Call 696445
